

Quick Start Guide

5-Minute Setup

1. Get Credentials (5 min)

Alpaca:

- Go to <https://alpaca.markets>
- Sign up for paper trading account
- Create API key in dashboard
- Copy: ALPACA_API_KEY and ALPACA_SECRET_KEY

Telegram:

- Open Telegram, chat with @BotFather
- Send: /newbot
- Follow prompts, get TELEGRAM_BOT_TOKEN
- Send message to your bot
- Visit: <https://api.telegram.org/bot{TOKEN}/getUpdates>
- Find chat ID in response

Security:

- Run: `openssl rand -hex 32`
 - Use output as ANALYSIS_API_KEY
-

2. Deploy (1 click)

- Click Deploy button in UI
 - Copy your new URL: <https://your-broker-xxxxx.abacusai.app>
-

3. Configure (2 min)

In deployment settings, set environment variables:

```
ALPACA_API_KEY=your_key
ALPACA_SECRET_KEY=your_secret
TELEGRAM_BOT_TOKEN=your_token
TELEGRAM_CHAT_ID=your_id
ANALYSIS_API_KEY=your_secure_key
```

4. Register Telegram Webhook (30 sec)

```
curl -X POST https://api.telegram.org/bot{YOUR_TOKEN}/setWebhook \  
-H "Content-Type: application/json" \  
-d '{"url": "https://your-broker-xxxxx.abacusai.app/webhook/telegram"}'
```

5. Create Cron Job (1 min)

Use Abacus AI Cron Job tool with:

- Name: Broker AI Analysis
 - Schedule: 0 */15 * * *
 - Endpoint: /analysis/run
 - Payload: {"api_key": "your_ANALYSIS_API_KEY"}
-

6. Enable First Symbol (30 sec)

```
curl -X POST https://your-broker-xxxxx.abacusai.app/config/AAPL \  
-H "Content-Type: application/json" \  
-d '{"enabled": true}'
```

Done!

Wait 15 minutes for first analysis run.

When signal generates:

- Get Telegram notification
 - Click BUY/SELL button
 - Order executes on Alpaca
 - P&L tracked in real-time
-

Verify Installation

```
# Check API is up  
curl https://your-broker-xxxxx.abacusai.app/health  
  
# View config  
curl https://your-broker-xxxxx.abacusai.app/config  
  
# View API docs  
https://your-broker-xxxxx.abacusai.app/api-docs
```

Common Issues

No signals?

- Check if symbol is enabled: GET /config/AAPL
- Wait 15 minutes for cron
- Verify at least 250 price bars available

Telegram not working?

- Verify webhook URL is correct
- Check bot token is valid
- Ensure chat ID matches

Order fails?

- Verify Alpaca credentials
- Check account has buying power
- Ensure market is open (9:30-4:00 EST)

Your hybrid AI broker is running. It analyzes markets, you control trades.
